
Bars: agent result or baseline mean. White dots: individual baseline seeds. Agent: one fresh run, 735/2,000 evaluations; GPT-6 Astra, max reasoning. Baselines: seed means (10 stochastic / 1 deterministic); 2,000-evaluation allowance. Means include seeds with a feasible incumbent; feasibility counts are reported. Regret $\leq 10^{-12}$ is shown at 10^{-12}; early-stopped baseline incumbents are carried forward. Execution failure at 735 calls: the agent's checkpoint adapter deadlocked while restarting COBYQA. Saved observations remain valid; 1,265 calls were unused.
